HAKAI

Immunity builder against caterpillar, Borer etc.

Hakai is a complex bio derivative that is a conglomeration of two organic compounds in nano forms. This organic nano formulation helps in efficient release mechanisms to create stable droplets which works at lower dosage, also ensures wide coverage ; consequently the product has performed well on insect pest protection on plants.

Advantages

- HAKAI is quite effective on several Lepidopteron and Coleoptile pests.
- It is certified organic product and does not leave any residues.
- It is well suited for Integrated Pest Management (IPM) practices.
- It helps in resistance management and safe for repeat applications.
- It is quite target specific and does not allow any cross resistance.
- It is pest specific, can be used in any crop and any agro-climatic zones

Dosage : 3 mL/L of Water

Application Method : Foliar spray

Crops : All crop
