

MAPLE

Neem - EM

Eco-Friendly Agricultural Solution

Why Choose Us?

Maple EM Neem is an eco-friendly, natural agricultural product that combines the insecticidal and soil-enriching properties of neem with the benefits of Effective Microorganisms (EM) technology. It is designed to protect plants from pests while improving soil health and nutrient availability.

Benefits of Maple EM Neem Products

Reduces Nematode Infestation

Effectively lowers harmful nematode populations in the soil, protecting plant roots and improving crop health.

Natural Source of NPK and Micronutrients

Provides essential nutrients like nitrogen, phosphorus, potassium, calcium, magnesium, sulfur, zinc, copper, iron, and manganese, enriching the soil naturally.

Increases Nitrogen Availability

Enhances nitrogen retention and availability in the soil for a longer duration, supporting sustained plant growth.

Promotes Plant Health and Immunity

Beneficial microbes in EM improve soil structure, nutrient uptake, and plant resistance to diseases.
